URG◎COIN

The perfect combination of entertainment and crypto

ABOUT URG CRYPTO COIN

Best way to reach future technology is... reward URG COIN

So many of you have heard that inflation is around the corner, and our money value is decreasing. Well they are not going to go away, but here to stay. We must get over with our fears, and embrace the future with bright hope of next level technology. We are introducing you the URG Coin. Next generation Web3 integration, high efficient smart contracts that are powered with solidity programming language, and designed to bring you the true blockchain solution to Mongolian soil.
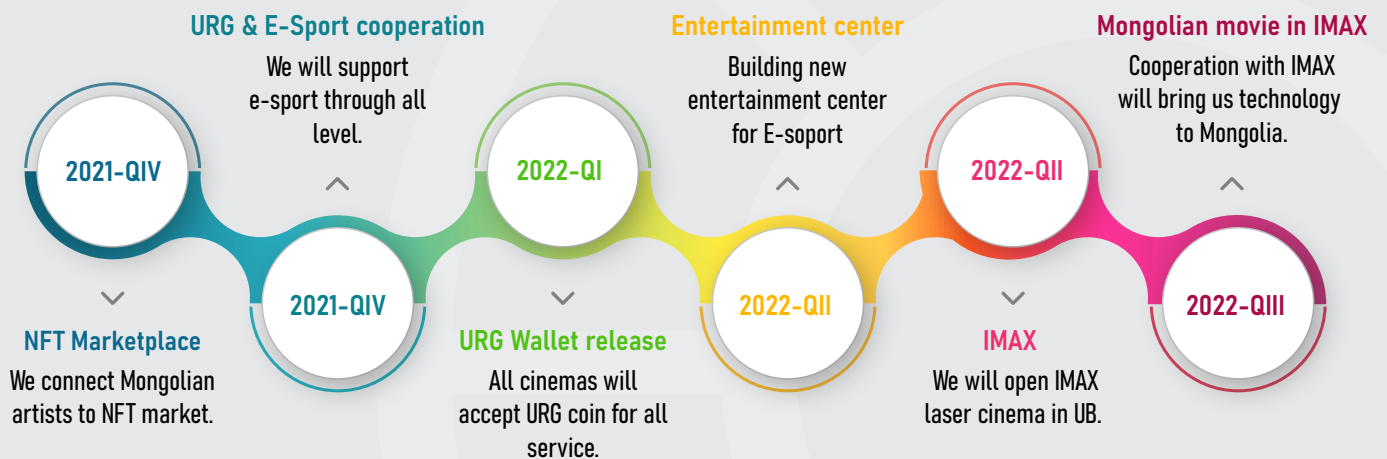

TABLE OF CONTENTS

ROAD MAP

Best way to reach future technology is... reward URG COIN

ROADMAP-1 CRYPTO & ENTERTAINMENT

URG & E-Sport cooperation
We will support
e-sport through all
level.

2021-QIV

2021-QIV

2022-QI

Entertainment center
Building new
entertainment center
for E-soport

2022-QII

2022-QII

Mongolian movie in IMAX
Cooperation with IMAX
will bring us technology
to Mongolia.

2022-QII

2022-QIII

NFT Marketplace
We connect Mongolian
artists to NFT market.

URG Wallet release
All cinemas will
accept URG coin for all
service.

IMAX
We will open IMAX
laser cinema in UB.

ROADMAP-2 CRYPTO & DeFi

2023-II

URG Whole & Retail services
Advanced Defi services
- URG Reward card
- Use blockchain technology to improve retail sector
    - High value goods authentic certificate such as jewelry, art or land ownership
    - Prevent fraudulent transactions with blockchain technology
    - Maintain and provide rewards for high value items such as property, vehicles, businesses,
        art, antiques, personal items etc
    - Managing loyalty points, club memberships
    - Secure reward coin transactions

2023-IV

2023+: Future Possibilities
- Fast and secure international promotion coin transactions between multiple major currencies
- Increasing the privacy, security and interoperability within healthcare industry
- Manage complex supply chain and logistics issues with large scale enterprise operations
- Data Security provider to enterprise and business sector applications

URG Coin BENEFITS

URG Coin is brought in BSC blockchain

WE are offering 33.3% of our TOTAL supply for IEO & Customer purchasing limitation is 50 million MNT.
Binance Smart Chain enables us fast transaction speed and cheaper fee & we are planning cryptocurrency using URG Coin.

URG Coin officially audited and certified.

IMAX   IMAX: INTELLECTUAL AND PHYSICAL INVESTING

IMAX – Supporting education

IMAX is supporting education project and implementing programs that allows you to view more content on the bigger screen.

IMAX - Scientific achievements on a larger screen

IMAX allows you to view major scientific breakthrough a documentary on a large screen.

IMAX opening
We will open IMAX cinema in UB with capacity of 400 seats and VIP section.

https://www.imax.com/content/education

Biggest e-sport event in Mongolia.
URG will host seasonal competition and event on TOP4
e-sport games.

URG Wallet in E-sport.
We offer URG coin for all service in E-sport centers and standardize gaming centers.

Team URG to the world.
We will build and support TOP4 e-sport gaming teams to
compete in Olympics and world.

To support the art of filmmaking, to improve the quality of the domestic film industry, to organize the sale of Mongolian films internationally, and to release Mongolian films on 10,000 IMAX screens around the world.

URG NFT will start selling NFTs of Mongolian filmmakers internationally. NFTs can really be anything digital (such as drawings, music, movie & movie characters, your brain downloaded and turned into an AI), but a lot of the current excitement is around using the tech to sell digital art.

NFTs for URG! NFT poster with your ticket? NFT copy of your movie? Thoughts?

DIGITAL OWNERSHIP
SYSTEM & CONCEPT OF DAO

The Story So Far

Back in November 2017, the world witnessed the birth of CryptoKitties. For the first time, a mainstream audience was using a decentralized application (dApp), breeding and trading adorable collectible cats that lived on the Ethereum blockchain.

While Crypto Kitties felt like a toy to many, it represented a dramatic shift in how we interact with items in the digital world. While previous digital items lived on company servers, blockchain-native items lived on shared, public blockchains owned by no single party. They could be viewed anywhere, exchanged openly, and truly owned in a way that was never before possible in the digital world.

Our URG Network's main goal is to bring more accessibility into our Mongolian market with digital asset ownership, and you can use that assets anywhere on the open blockchain to trade and manage any way you want. That is why we are so committed to bring you this technology into your everyday usage.
INVESTMENT

IMAX technology combines a variety of technological innovations: special cameras, special projectors, wide screens, specially-designed theatres with steeply raked seating, and films shot on 65mm negative stock..

URG NETWORK is planning to open IMAX laser cinema in UB & Mongolian 1st movie for IMAX across 10,000 screens worldwide.

Dolby Cinema is a premium cinema created by Dolby Laboratories that combines Dolby proprietary technologies such as Dolby Vision and Dolby Atmos, as well as other signature entrance and intrinsic design features. The technology competes with IMAX and other premium large formats.

URG NETWORK is planning to open our next cinema with Dolby Cinema..

COMMUNITY GOVERNED FULLY DECENTRALIZED

The credit computation algorithms, the data origins, and the identity registrars are all governed by the URG stakeholders. The relationships and activities of community members can be recorded on chain and generate community governance credit. For further use, all the governance credit will contribute to voting power.

URG NETWORK processes DID verification, aggregation, and computation requests from service demanders and returns trustable results. The process will be implemented by a random set of validators in the network in a fully decentralized and transparent way.

Blockchain Powered

URG NETWORK is built on solidity integrated in Web3.0 new internet platform, which inherits great features and best technologies of the Blockchain industry. URG NETWORK aims to be a Local and Global Power House Network that can benefit Mongolians in the world ecosystem and shared security. Together we will build a great nation.

Privacy Focused

Privacy protection is the foundation of the URG network and we do not want to breach the pseudo-anonymity of blockchain networks. URG network supports highly secure and reliable on-chain data processing.

URG NETWORK's Role

As people have already generated massive amounts of data in various decentralized systems, a way must be found to connect these data so that they can flow across different systems and platforms, while user privacy and data sovereignty are preserved. This approach can truly reflect the core value of Web3. Meantime, the advent of blockchain provides an effective underlying data registry infrastructure that enables data to be indexed and retrieved, as well as bolstering the growth and adoption of DID.

URG NETWORK is helping solve this problem with an identity aggregation protocol that serves for multiple networks. URG Network enables DID aggregation, verification, and credit calculation/grading. It mitigates the difficulty of resolving agnostic DID mechanisms by integrating all DID standards into a modularized identity model. These services can be widely implemented in DeFi, on-chain governance, and decentralized KYC. The processes of data aggregation and verification are transparent, secure, and privacy-preserving.

Cyber Security
System & Concept of Decentralization

Decentralization of identity storage
DID-account relationships under encryption by large and stored on-chain. Other DID data are directly returned to the service demander in real-time, instead of being stored on network servers.

Decentralization of identity relationships
The relationship of data, and identity could be validated with cryptographic calculation, and it is also registered in the decentralized network instead of regular centralized services like Certificate Authority used in HTTPS protocol. Different identities belonging to the owner are not discoverable and protected by cryptography.

Decentralization of identity authentication
The identity validator directly connects to the decentralized network, and it could validate the authentication request independently.

PLAY. CREATE. OWN. GOVERN. EARN.

The URG team is building a unique virtual world where players, and watchers can build, own, and monetize their gaming experiences using URG, the main utility token of the platform.
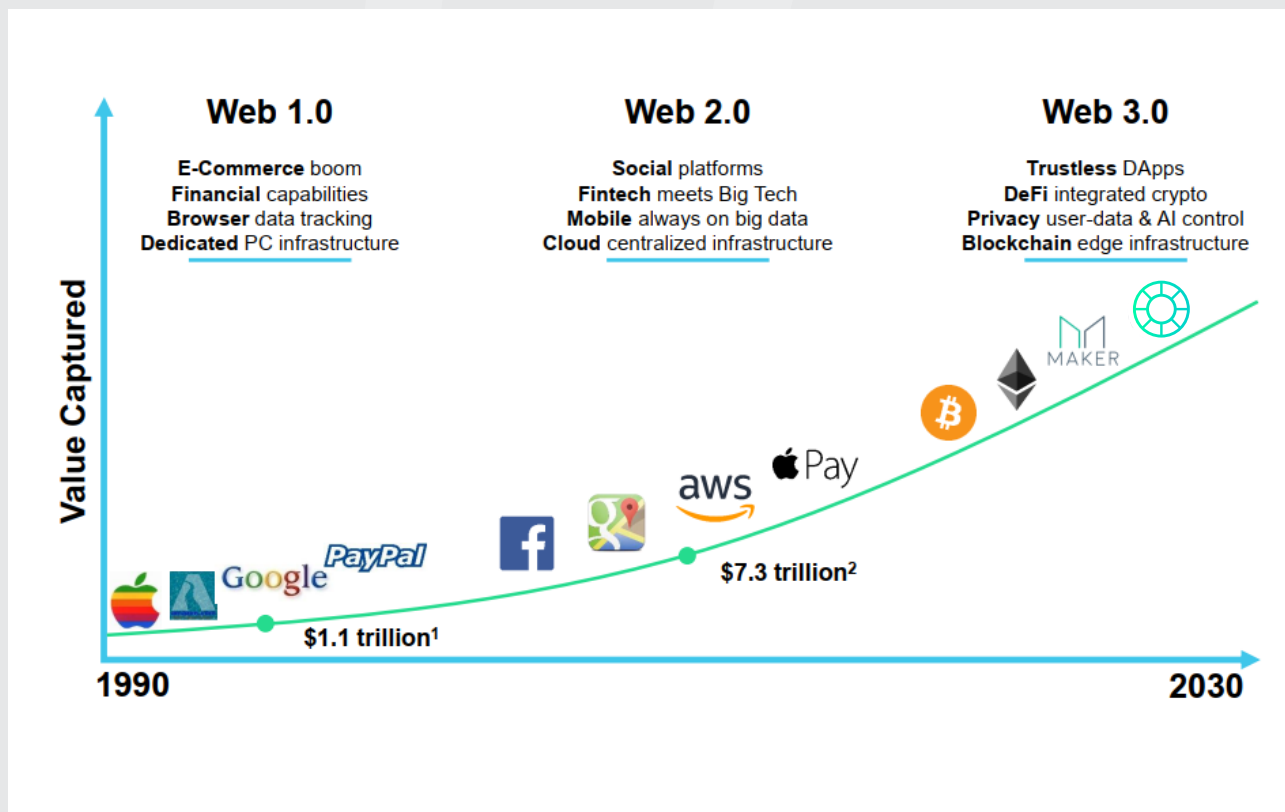

URG holders will be also able to participate in governance of the platform via a Decentralized Autonomous Organization (DAO), where they can exercise voting rights on key decisions of The URG NETWORKs ecosystem. As a player, you can create digital assets (Non-Fungible Tokens, aka NFTs), upload them to the marketplace, and drag-and-drop them to create game experiences with The Sandbox Game Maker. The URG NETWORK will secure many partnerships in order to build a fun, creative "play-to-earn" Gaming platform, owned and made by players. The URG NETWORK aims to bring blockchain into mainstream media, gaming, attracting both crypto and non-crypto game and viewer enthusiasts by offering the advantages of true-ownership, digital scarcity, monetization capabilities, and interoperability.

TECH INNOVATION STAGES

Web 3.0

As we approach into this new era of technological advancement. The graphics shows how our internet evolution took in place with new innovative application on top of it. Most of it known as data driven platforms. Now, we are experiencing the decentralization and programmable money applications built on top of mainly on Ethereum and defi platforms.

In near future, approximately close to 2030. Our next decade most likely to defined by the Decentralized ecosystems built around cryptocurrency. It is inevitable that Mongolians future will be influenced by these new technology.

Early Innings of Crypto Tech Absorbing Big Tech

The digital world is ever growing and ever-changing and now new ways of paying for things in the digital world are expanding, too.
The foundations* of the technology known as blockchain are here to stay.
Blockchain, a way of recording transactions*, is still very new and is being compared to the way the internet was in 1994.

Building a crypto tech platform offering a new evolution beyond currency

Crypto networks are next-generation, open, global and decentralized versions of internet and financial technology companies.
Bitcoin goes beyond PayPal by allowing anyone, anywhere to seamlessly exchange value. Ethereum goes beyond Ant Group by enabling a global ecosystem for broad-based financial services outside of payments (DeFi) on its super app cloud platform.
URG Network takes past innovations and applies new elements of privacy, user data ownership, and app scalability.
It's early days, but URG Network offers a glimpse at what a global, decentralized, neutral, permissionless and private version of Tencent's super app platform, WeChat, could look like if successful.

Standing apart as Mongolians only live privacy focused Web 3.0 cryptonetwork

Cryptocurrencies have focused on either offering privacy features for payments or distributed computing applications enabling users to build decentralized internet applications (Web 3.0). URG NETWORK bridges both of these worlds.
Privacy within various layers of the tech stack, while also enabling an open platform of decentralized applications to make use of these privacy features.

ALLOCATIONS

URG was founded under the dedication of lifting up Mongolians lives all over the world. One of our main goal is on donating to Mongolia's most effective charities and organizations.
Our goal is to help save lives, prevent suffering, and ensure a brighter future with self governed secure blockchain technology, and build up the self-reliance capacity to our society.

TOTAL COIN: 30,000,000,000

1) IEO: 10,000,000,000

/IEO PRICE - 1MNT OR 0.00035$/

2) INTERNATIONAL IEO: 10,000,000,000

3) STABILIZATION FUND: 3,000,000,000

4) PLANNED INVESTMENT: 🔒 7,000,000,000

5) INTERNATIONAL IEO PRICE - TO BE DETERMINED ON Q3/2022

INVESTMENT RISK FACTORS

Risk of Market Trends: The URG Coin may be significantly influenced by cryptocurrency market trends and
may be severely depreciated, due to related events in the cryptocurrency markets.

Risk of Regulation/Legislation: Token Market may be or might be coming under global or local regulation/ legislation, that may limit the use of URG Coin tokens as a method of payment, and/or limit, prevent and/or sanction the sale and resale of URG Coin. IEO, STO and relevant technologies have been subject of scrutiny by various regulatory bodies, all over the world. The functioning of URG Coin could be impacted by one or more regulatory inquiries or actions, including, but not limited to restrictions on the use or possession of security tokens, which could impede or limit the development of URG Coin program.

Risk of High Volatility: Cryptocurrencies are extremely volatile and URG Coin may suffer from such volatility.
Risk of Taxation: The ownership of URG Coin tokens may fall under existing and/or new and unpredicted Taxation Laws that will erode URG Coin benefits.

High Risk Purchase: There is no guarantee that the URG Coin you purchase will increase in value.

Risk of Insufficient Interest in the URG Coin activity: It may be possible that the URG Coin will not be used by a large number of businesses individuals and other organizations and that there will be a limited public interest in its creation and development.

Audit report summary

Auditing Firm	InterFi Network
Architecture	InterFi "Echelon" Auditing Standard
Smart Contract Audit Approved By	Chris | Blockchain Specialist at InterFi Network
Project Overview Approved BY	Albert | Project Specialist at InterFi Network
Platform	Solidity
Audit Check (Mandatory)	Static, Software, Auto Intelligent & Manual Analysis
Project Check (Optional)	KYC, Website & Socials Analysis (Not Applicable)
Consultation Request Date	October 09, 2021
Report Date	October 12, 2021

Audit Summary

InterFi team has performed a line-by-line manual analysis and automated review of the smart contract. The smart contract was analyzed mainly for common smart contract vulnerabilities, exploits, and manipulation hacks. According to the smart contract audit:

❖ **URGO Token's smart contract source code has LOW RISK SEVERITY.**
❖ **URGO Token has successfully PASSED the smart contract audit.**

For the detailed understanding of risk severity, source code vulnerability, and functional test, kindly refer to the audit.

THANKS FOR ATTENTION.
